

Vinod Sharma

Chicago, IL (Open to relocate) | work.vinodsharma23@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

- Software Engineer with 3+ years of experience building and operating large-scale systems at **Bank of America** and **Fidelity Investments**. Strong background in Java/Spring Boot microservices, React/TypeScript frontends, and AWS infrastructure supporting tens of millions of users.

Experience

Bank of America

Aug 2025 – Present

Software Engineer

Chicago, IL

- Designed and shipped React/TypeScript features for a consumer-facing platform serving **57M+ active users**, reducing UI rendering time by 20% through component refactoring and performance optimization.
- Built and Maintained **5+ Java/Spring Boot microservices** handling **200K+ daily API requests** secured with **OAuth 2.0, RBAC, and OWASP** standards and running at **99.9% uptime**.
- Right-sized **AWS infrastructure (EC2, S3, Lambda)** and eliminated bottlenecks that were causing **25%** slowdowns during peak load.
- Automated **3 manual workflows** in **Python**, saving the team roughly **35%** of operational overhead each sprint.
- Shipped **8+ features** across 14 sprints with zero production incidents, actively involved in sprint planning, code reviews, and cross-team technical discussions.

DePaul University

Feb 2024 – Jun 2025

Software Engineer

Chicago, IL

- Replaced 4 paid third-party tools with custom **Node.js and Spring Boot** microservices, cutting departmental software costs by **70%** and serving **100+ staff** on day one.
- PostgreSQL/MongoDB** query refactoring brought a **60%** performance improvement across core academic workflows, system has held **99.9% uptime** since launch.
- Set up **Nginx** reverse proxy and load balancing on **DigitalOcean**, dropping API latency by **60%**, wired **GitHub Actions + Docker** for fully automated, zero-downtime deploys.
- Led authentication and authorization hardening across platforms using OAuth 2.0, SAML, and RBAC, securing sensitive student and admin data and meeting enterprise security standards.

Fidelity Investments

Jan 2022 – Jun 2023

Software Engineer

Bangalore, India

- Wrote and maintained 8+ Java/Spring Boot APIs and microservices processing **100K+ daily events** across 3 internal platforms all at **99.9% uptime**.
- Worked across the stack JavaScript/TypeScript on frontend, **Python/Spring Boot** backend) to ship internal tooling that cut page load time by **20%** for 3 teams.
- Tuned **SQL schemas and AWS RDS queries**, data retrieval dropped by **35%** on the highest-volume reporting jobs.
- Helped migrate pipelines to **Jenkins CI/CD** and containerized deploys with **Docker/Kubernetes** release cycle went from **2 days to 3 hours**.

Projects

SmartReached - B2C SaaS Platform | *Next.js, TypeScript, Python, FastAPI, Supabase, AWS, Stripe*

Link

- Built an AI-driven outreach platform using LangChain and OpenAI to generate personalized cold emails, increasing reply rates from 2% to 8%.
- Designed a scalable backend with FastAPI and Supabase handling 10K+ daily API requests with zero payment failures via Stripe integration.

Technical Skills

Languages: Java, Python, TypeScript, SQL

Backend: Spring Boot, FastAPI, Node.js

Frontend: React, Next.js

Cloud: AWS (EC2, S3, RDS, Lambda)

DevOps: Docker, Kubernetes, GitHub Actions, Jenkins

Databases: PostgreSQL, MongoDB, Redis

Education

DePaul University

Chicago, IL

Master of Science in Computer Science

Gujarat University

India

Bachelor of Computer Science

Certifications

AWS Certified Solutions Architect – Associate
